Dear Sir;

I spent 47 years selling power tools in this great country of ours called the United States of America.

In those 47 years it was not too hard to see how companies such as Wal-Mart hurt the small business man and put them out of business.

Please, don't let this happen to the banking industry, let the little guy survive.

It's bad enough that Wal-Mart is causing our American companies to build plants in China in order to increase their profit margin and take away jobs in his country.

Politics makes strange bedfellows.
